Forecast for Sunday 19 Sep 2021

Weather: A cloudy and wet start to Sunday with low cloud and rain, which could be heavy at times. The rain will gradually fade away through the morning, though a second band of low cloud will move over around dawn. This second cloud band will slowly lift and clear over the late morning and start of the afternoon. An increasing number of sunny intervals developing from then on before skies clear into the evening and night.

Chance of cloud free mountain/hill tops above 600m: 20% for most of the morning except for the interlude between cloud bands where it will rise to 60% for a short time. Becoming more consistently 70% in the afternoon and even better thereafter.

Visibility: Poor at first, especially in the west, with cloud bases 300-400m. Cloud bases slightly higher in the second band – predominantly 500m but dropping to 400m occasionally. Cloud bases rising to above the summits by mid-afternoon as skies clear, bringing very good visibility of distant hills from then on.

Meteorologist's View

The best walking conditions will be in the afternoon. Care should be taken if going out in the morning owing to low visibility and wet paths after any rain.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Sat 18 Sep 2021	0.4mm	0.6mm	0.6mm

Forecast for Monday 20 Sep 2021

Weather: Clear skies overnight into Monday. Some mist and fog patches forming in the early hours, but these should clear shortly after sunrise. A fine and dry day follows with long intervals of sunshine. Clear spells continuing into the evening, though more cloud building through the night.

Maximum wind: Winds on the summits initially northwesterly 15mph, easing to 7mph by the evening.

Chance of cloud free mountain/hill tops above 600m: 90% or better through the day.

Visibility: Poor in any early mist and fog patches. Very good from then onward with any cloud remaining above the summits and good views of surrounding hills.

Temperature: **Valleys:** Plus 9 Celsius, rising to plus 19 Celsius.
At 600m: Plus 7 Celsius, rising to plus 12 Celsius.
Freezing level: Above the summits.
